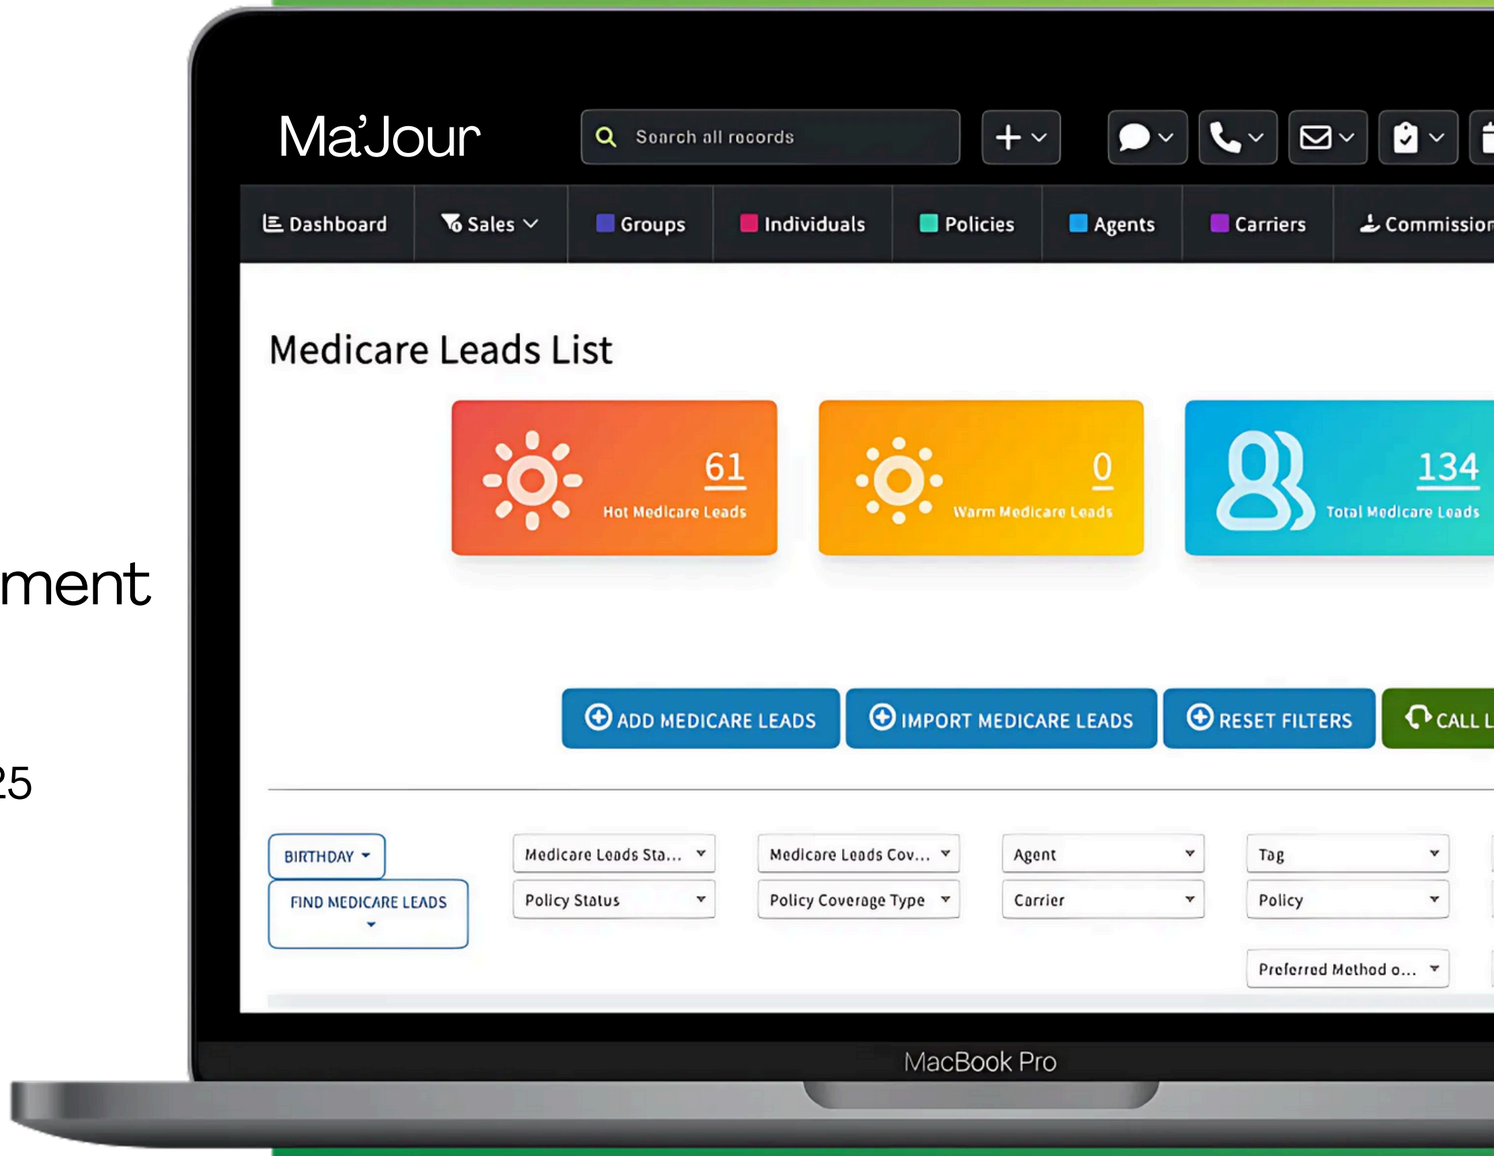
Revolutionizing Healthcare Procurement & Delivery in MENA

Prepared by: Dr. Theeb Alkahtany | July 2025



Agenda

1. **Who We Are**
2. Problem & Market Opportunity
3. Our Solution
4. Business Model & Execution
5. Financials & Unit Economics
6. Team & Roadmap

Introduction

Healthcare systems across MENA are bleeding billions due to outdated, volume-based procurement—Majour solves this with the first Saudi-native SaaS platform that ties payments to real patient outcomes, transforming inefficiency into measurable value.

Mission

To accelerate value-based healthcare in MENA through digital tools that link outcomes to reimbursement.

Vision

We envision a healthcare future where spending is measured by outcomes, not by volume—where value defines the standard of care across every clinic, payer, and patient journey.

Agenda

1. Who We Are
2. **Problem & Market Opportunity**
3. Our Solution
4. Business Model & Execution
5. Financials & Unit Economics
6. Team & Roadmap

$300B wasted globally on low-value healthcare (WHO, 2021).

>70% In KSA, >70% of healthcare spending is on reactive treatment, not prevention or outcome-based services (CHI, 2024).

No VB Most interventions are not evaluated for actual health impact — causing budget waste and inefficiency.

Market Opportunity

Trends

- Saudi Health Sector Transformation Program (**Vision 2030**) prioritizes **outcome-based reimbursement**
- **80%** of GCC nations have initiated **VBHC-related policy reform** (source: OECD)

SOM

$480M

VBHC addressable IT & licensing spend in GCC by 2027

SAM

$22B

spent on procurement of drugs, devices, services

TAM

$105B

total MENA healthcare spending (WHO, 2023)

Healthcare delivery must become intelligent, ethical, and outcomes-driven—where every intervention is measured by the value it brings to patients, not just the cost it incurs.

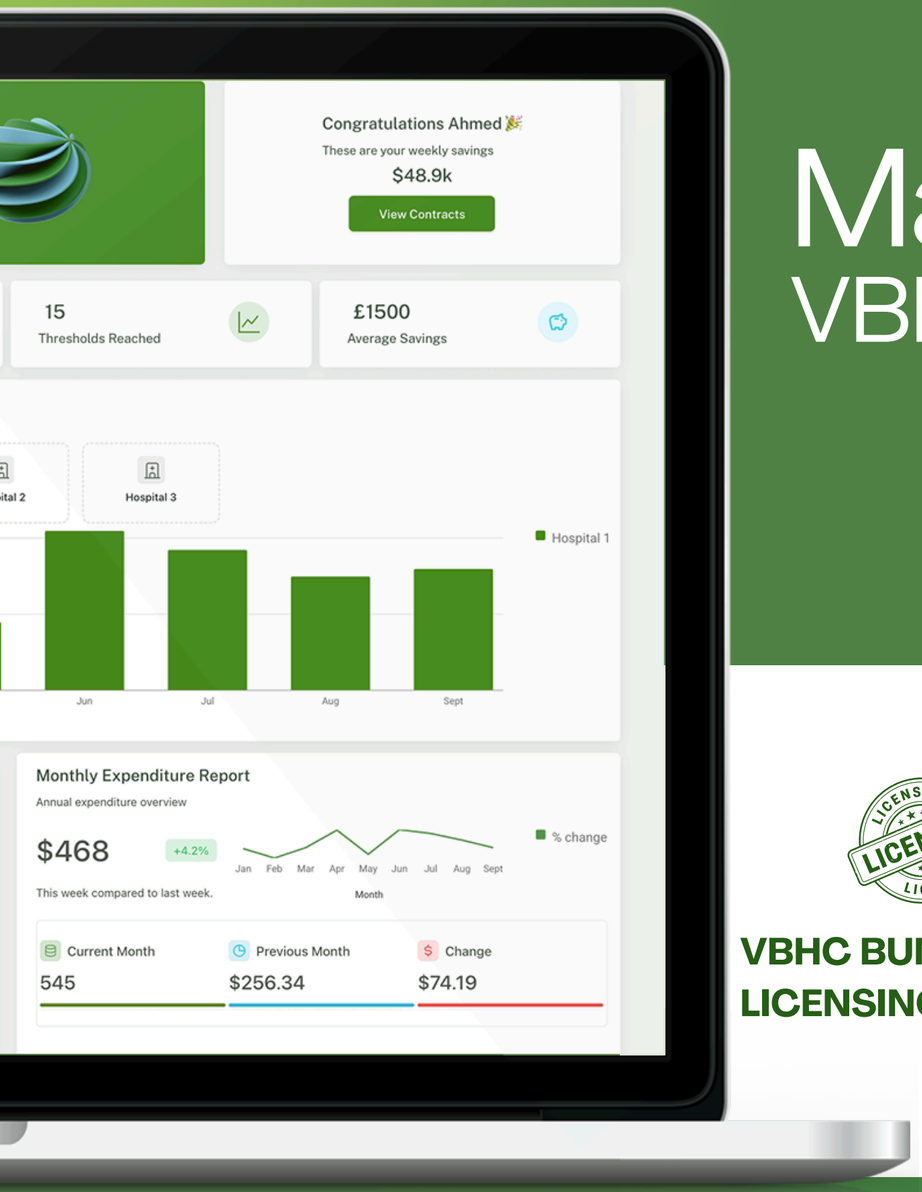
6 Team & Roadmap



Ma'Jour
VBP/VBHC

Ma'Jour is the first AI-Powered SaaS platform in MENA that operationalizes **Value-Based Healthcare** (**VBHC**) and **Value-Based Procurement** (**VBP**) through **outcome-driven contracting, care pathway licensing, and blockchain-verified smart payment automation.**

VBHC BUNDLE LICENSING ENGINE

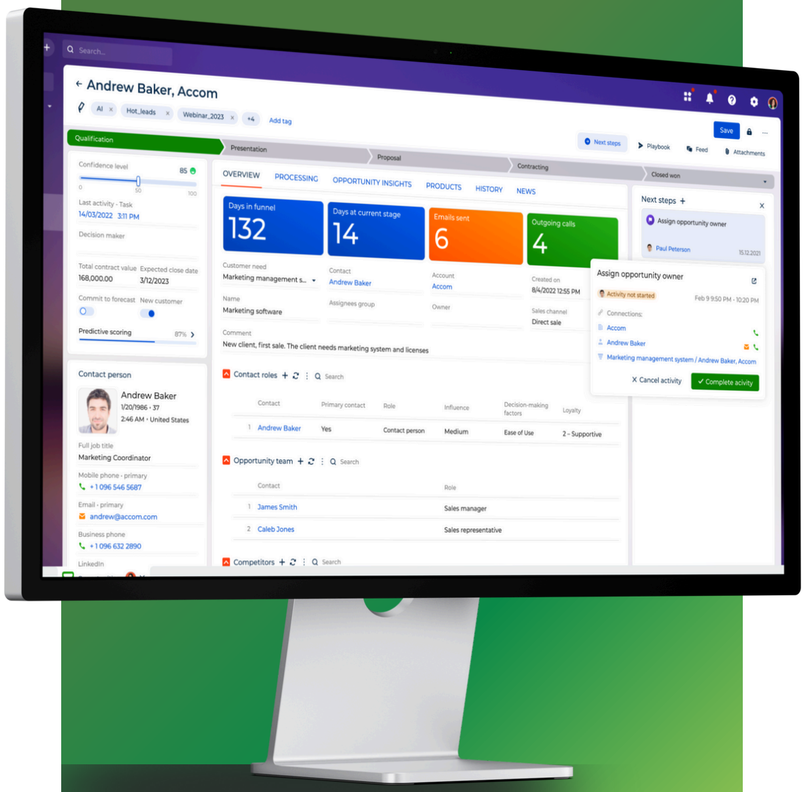
(VBP) SCORING ENGINE

PROMs / PREMs COLLECTION

BLOCKCHAIN-ENABLED SMART CONTRACT

Value-Based Contracting & Procurement Solutions

Ma'Jour
VBP/VBHC



1 We **license pre-built, outcome-based care bundles** —customizable for local hospitals and aligned with Saudi Vision 2030 reform.

2 Our **VBP scoring engine** helps procurement teams evaluate suppliers based on clinical outcomes, not just cost.

3 We capture **PROMs and PREMs** in Arabic to track patient recovery, experience, and real-world treatment effectiveness.

4 **Smart contracts on blockchain** trigger payments only when verified health outcomes are achieved.

5 **We enable healthcare organizations to buy technologies** based on outcome with our patented value-based smart contracting

Traditional Insurance

Hospital — Procurement — Supplier — Delivery — Use — Invoice — Reimbursement — Report

Ma'Jour VBP/VBHC

Payer/ Hospital — Ma'Jour — Licensed Bundle — Smart Provider — Care — Outcome Validation — Blockchain Payment and AI Value Insights

We are fully dedicated to transforming how insurers and healthcare organisations spend and generate value using sophisticaed technology

HOW IT WORKS

1 BUNDLE ACTIVATION

Hospitals or payers license care bundles via Majour (e.g., trauma, maternity, oncology).

2 SMART PATHWAY DELIVERY

Providers deliver care as per pathway guidelines while PROMs and milestones are tracked.

3 OUTCOME VALIDATION

Majour verifies outcomes using integrated clinical + patient-reported data (PROMs/PRIMs).

4 BLOCKCHAIN-POWERED PAYMENT

A smart contract is triggered for outcome-based payment release.

5 VALUE INSIGHT & FEEDBACK

Dashboards present bundle ROI, procurement value, and provider performance metrics.

We help payers, hospitals, and suppliers shift from volume-based spending to value-based financing

Ma'Jour enables both insurers and healthcare providers in Saudi Arabia to reduce the cost of care delivery and increase profitability by optimizing outcomes under the DRG model currently being adopted in the Kingdom.

Unique Value Proposition

First Saudi-native SaaS platform combining VBHC + VBP in one stack, with **US, UE & UK Patents.**

Blockchain-native smart contracts automate performance-linked reimbursement.

Arabic PROMs/PREMs suite integrated with bundled pathways and payment triggers with **patient experience to improve data quality**

Licensable care bundles accelerate hospital VBHC readiness, with **AI for wastage saving**

Designed to be NPHIES-, DRG-, ZATCA-, and GOSI-**compliant from day one.**

5 Financials & Unit Economics

6 Team & Roadmap

Structure & Revenue Streams

Annual Licensing Fees

Clients

Public health clusters (e.g., GHC, SEHA, MoH entities)

Private hospital networks (e.g., Sulaiman Al Habib, Dr. Fakeeh)

Insurance payers (e.g., GOSI, BUPA, Tawuniya)

Government-linked procurement bodies (e.g., NUPCO)

Key Metrics

CAC	LTV	AOV per Contract	Bundle Gross Margin	Payback
$7K	**$120K per client per year**	**~$12K**	**~65%**	**2-3 months**

COMPETITIVE LANDSCAPE

IMPACT

Procurement Savings

Majour's outcome-based procurement model reduces overspending on ineffective interventions and **can provide 100% rebates and dose replacements** — delivering an estimated **15–30% cost savings per licensed bundle** (based on pilot projections and OECD data).

Clinical Quality Improvement

By linking payment to outcomes, Majour i**mproves provider adherence to evidence-based care pathways** — reducing variation in care and medical errors.

Transparency & Accountability

For the first time, payers and policymakers get **real-time insight into how much value each riyal buys** — improving trust in procurement and healthcare spend.

Patient-Centered Transformation

PROMs and PREMs capture the patient voice in real time — empowering health systems to measure what matters most to patients: recovery, dignity, and quality of life rewards result in average of **500%+ improvement in response rate.**

ROADMAP

2026

National Expansion

We scale across Saudi Arabia with **10+ hospital deployments**, payer contracts, and full integration with national systems.

2027

Regional Growth

We **expand into the GCC,** launch the Majour Marketplace, and publish the first MENA PROMs benchmark report.

2028

Product Evolution

We diversify into **new clinical areas**, launch predictive procurement tools, and partner with global policy leaders.

2029

Market Leadership

We **lead the region with shared-savings contracts**, AI-powered planning, and expansion into Egypt and Jordan.
