Globally healthcare stakeholders are facing a critical challenge: ensuring access to quality healthcare while managing ever-increasing costs. They know that certain treatments could save lives and improve patient outcomes, but they faced a daunting financial hurdle.

We enable health systems to overcome financial constraints via value-based procurement and ensure patients receive the life-saving treatments they desperately need.

This means that manufacturers and suppliers need to prove the value of their treatments.

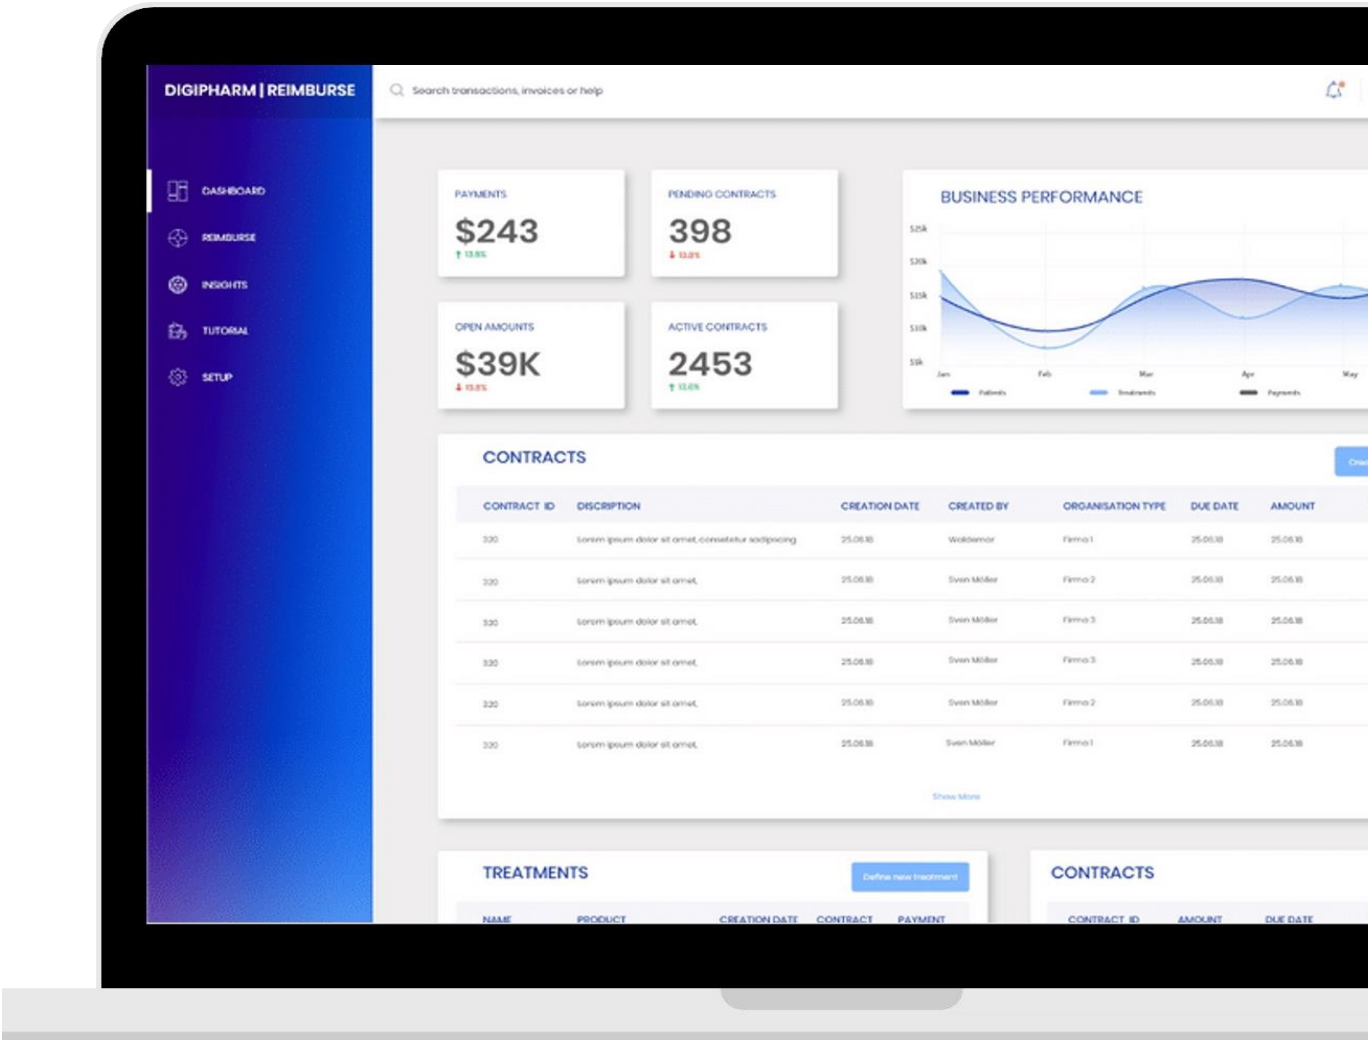
Save With Reimburse

Our neutral, third-party platform automates & validates outcome-based contracts with manufacturers and suppliers, enabling procurers to implement performance-based pricing for vital technologies.

We help to maximise budgets and enable provision therapies that were previously out of reach.



'Digital Healthcare Platform Of The Year 2024" LUXLife Awards

"Leading Innovators in Healthcare Procurement & Patient Engagement 2023 – Switzerland" GHP Awards

"Healthcare Platform Of The Year – 2023" - Corporate LiveWire

"Most Innovative Flexible Pricing Platform in 2022" W&F Awards

Reimburse is shifting the procurement landscape, ensuring financial constraints no longer stand in the way of providing the best treatments or health technologies.

Applicable to:

- Diagnostics
- Medical Devices
- Healthcare Services/Supply Chain
- Pharmaceuticals
- Robotics/IOMT
- Digital Therapeutics
- Clinical Trials

Pay for health technology based on performance.

Requirements = Capture performance data and develop smart contracting agreements with suppliers. Reporting outputs directly to NHS systems
