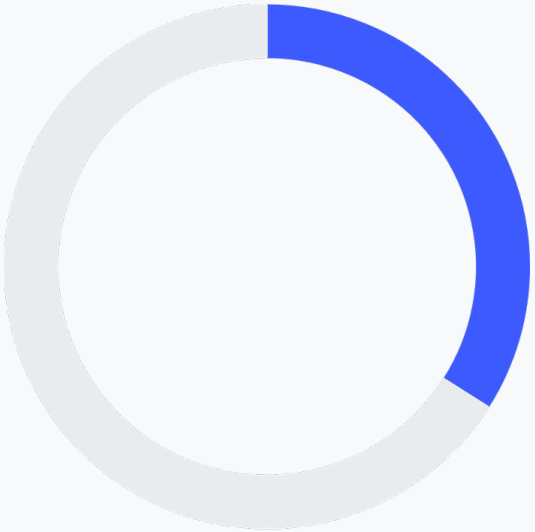
The Business Model of Healthcare Is About to Change. Forever.

INVESTOR INTRO · 2026

Vaccines. Antibiotics. Gene Therapies. Each redefined medicine's value equation. Value-Based Procurement is that shift for how health systems spend — and DigiPharm is the platform that makes it happen.

Digi Pharm®

$300B Wasted Annually in Healthcare Procurement



34%

Global Hospital Budgets Lost

$16B

Wasted annually in MENA alone — in a $50B market.

ROOT CAUSE

Volume-Based / Fee-For-Service purchasing. Pay more, get more, prove nothing. No accountability for outcomes.

The problem isn't a lack of budget — it's a complete absence of accountability for how that budget performs.

SEED ROUND · OPEN NOW

WHY NOW?

Our gain-share model is commercially powerful but creates a natural capital timing gap — savings are verified and paid quarterly. This raise accelerates deployment while the revenue engine scales.

Product Development

Enterprise-scale enhancements to TSUNAMI AI & DIGIHEALTH for GCC and Africa deployment.

Commercial & Sales

Dedicated BD hires to close GCC and Africa pipeline and manage enterprise sales cycles.

Market Expansion

In-market presence across KSA, UAE and target African nations to accelerate deal closure.

Working Capital

Bridge the quarterly gain-share cycle as new health system clients are onboarded.

At 25% gain-share, a single mid-sized client more than returns this raise. We're funding execution, not experimentation.
